Summary:

Electronic portfolio (EP) is a web application, which was developed at Andragogic centre in Slovenia for identification and recognition of non-formal learning. Portfolio is designed in a way, that candidates can be presented entirely with all applications and learning activities achieved in the working and private life. It may consist of various documents: of those, which are about individual qualification prepared by others (e.g.: teachers, counsellors, employers), reflections about learning activities, especially learning achievements and candidate's products, projects or other forms of copyrighted work. Electronic portfolio allows creativity and the presentation of individuality.

Description:

To use E-portfolio we need a PC (stationary, portable notebook, netbook, tablet, smartphone) and an operating system (Linux, Mac, Windows), which is connected to the Internet and has loaded the appropriate web browser. For

comfortable work, broadband connection to the Internet is recommended, regardless of the browser, which should be the latest version of Firefox, Chrome, Safari, Opera or IE 8-10.

The entry registration is required with a username and password. Before use, the users must read the terms, conditions of use and privacy statement and agree with them.

A portfolio consists of tools for the collection and compilation of data and documents, where users can create their profiles, CVs, uploaded documents and learning diaries. Tools are available for the organization of the documents, where users can arrange elements they want to include in their portfolio or choose between different views of portfolio for different target groups.

Tools are also available for sharing and networking: here users can edit privacy, find friends, join groups or discuss different topics.
